CART Summer Academy

Mini-Med School

Have you ever wondered how your heart pumps, eyes see, or lungs breathe? Join us on a journey of discovery as we explore the inner workings of the human body. This hands-on, laboratory based experience will give your child an opportunity to: dissect an eyeball, listen to their heart, learn basic first aid, hold a brain, tour an ambulance, learn CPR and many more activities that explore the wonders of the human body at CART Mini-Med School.

Drama & Performance Art

Students will explore various types of performance art combined with developing drama skills required to present a chosen piece at our showcase. This class is for students who enjoy being creative and want to learn how to improve performance skills.

Game Design

Students will learn how to use game development software and tools to design and build a two-dimensional computer game. They will learn the basics of game programming, graphics, animation and sound. Software: Game Maker, Adobe Photoshop.

Movie Magic

Students will use digital cameras and computer software to learn the skills needed to create a short movie. This class is for students who love movies, enjoy telling story stories using love action and love to be creative.

CSI Forensics

Discover the world of the forensic scientist as you explore the world of evidence and crime scenes. Students will work with various types of evidence, such as footprints, fingerprints and DNA analysis as they figure out "who done it!"

Lemonade Stand Business

Students will go behind the scenes at Jamba Juice to discover the tasty details that go into running a business. Students will learn how to create commercials and print media to promote the unique selling points of a deliciously dynamic business.

Builders Workshop

This class is perfect for those who love to tinker, to build, to take things apart and to put them back together. Students will have an opportunity to be creative, explore design elements, and build toys, models, trinkets and more
